

PERFORMANCE PLANTS, INC.

PERMANENT RESEARCH POSITION

AVAILABLE IN JANUARY 2022

A plant physiologist position is available in the Gene Discovery & Trait Assessment Program at Performance Plants Inc starting in January 2022.

The plant physiologist will be part of Trait Assessment, responsible for planning, designing, organization of our annual field trials, and also involved in our physiological experiments for various plant species in growth chambers. The qualified applicants should possess a M.Sc. or Ph.D. in plant physiology, crop science, breeding or agronomy and relevant agricultural biotechnology experience. Specialized research background working in the field of plant stress and experience involving in submissions for regulatory approval of transgenic crops are an asset. In general, the candidates will ideally be detail-orientated, well-organized, enthusiastic and able to appreciate goal and team-based research and development.

Performance Plants Inc. is award-winning Canadian agricultural biotechnology company, whose mission is to discover, develop and commercialize innovative plant biotechnologies that improve crop performance and agricultural productivity to combat climate change for a sustainable agriculture. The Company is located in the beautiful city of Kingston, Ontario of Canada.

Interested applicants should send their curriculum vitae (including the names of three references) to:
